

WEB DESIGN FOR TEENS

EMPOWERING TEENS TO BUILD FUNCTIONAL AND PROFESSIONAL WEBSITES

PROGRAM OVERVIEW

- **Duration:** 8 weeks
- **Schedule:** 2 Days a week, 2.5 hours per day
- **Age Group:** 14–17
- **Prerequisites:** Basic computer skills; no prior web development experience required
- **Location:** eCode Learning Center
- **Format:** Interactive sessions with hands-on learning, project-based activities, and real-world applications.

PROGRAM OBJECTIVES

Teens will gain the knowledge and skills to design, build, and launch fully functional websites for budding entrepreneurs using **WordPress** and the **Divi Theme Builder**. By the end of the program, participants will:

- Develop expertise in website design and functionality.
- Learn to use Divi design tools for customization and branding.
- Understand the basics of hosting, domain setup, and content management.
- Gain practical experience by creating a website for a real client.

PROGRAM HIGHLIGHTS

- **WordPress Mastery:** Explore themes, plugins, and customization options.
- **Design with Divi:** Master drag-and-drop design tools for stunning, responsive websites.
- **Real-World Projects:** Work with entrepreneurs to create tailored websites.
- **Team Collaboration:** Develop problem-solving and communication skills by collaborating with peers.
- **Showcase Ready:** Present completed websites to clients and families during the final showcase.

WHY JOIN THIS COURSE?

- Hands-on experience with the industry-standard WordPress CMS.
- Learn valuable design and development skills with guidance from expert instructors.
- Build a portfolio-ready project to jumpstart opportunities in web design.
