

WEB DEVELOPMENT BASICS

PROGRAM OVERVIEW

Participants will delve into the fundamentals of web development, learning about domain registration, hosting setup, cPanel Configuration, content management installation, and essential web design and Plugin Management tools.

PROGRAM HIGHLIGHTS

- Introduction to domain registration and hosting setup for websites
- Hands-on experience with cPanel Configuration for managing web hosting
- Installation and customization of content management systems (CMS) for website creation
- Exploration of web design principles and management of plugins for added functionality

PROGRAM DETAILS

- **Duration:** 2 days consist of Day 1 – 1.5 hours and Day 2 – 2.5 hours.
- **Age Group:** Teens + Young Adults
- **Location:** eCode Learning Center
- **Format:** Workshop-style sessions featuring instruction, demonstrations, hands-on exercises, and Q&A sessions

PROGRAM OBJECTIVES

- Equip participants with the foundational knowledge and skills needed to begin their journey in web development
- Provide practical experience with essential tools and techniques used in website creation and management
- Foster creativity and problem-solving abilities in designing and customizing websites
- Empower participants to continue learning and exploring advanced web development concepts independently.
